## Summary

Junior Frontend/Full-Stack web developer. experienced in writing single-page applications using the latest web technologies such as React, Redux, NodeJS and MongoDB.

Highly motivated, passionate about technology and solving challenges, fast learner, strives for continuous improvement and a team player.

## My latest Project

**Tenner** - my final project. A platform for connecting to freelancers (Inspired by fiverr).

In this project, I designed and developed a pixel-perfect "fiverr" React clone.

Users can login and search the freelancer that they are looking for by filtering or exploring the site. Once users place an order, the freelancer can see and be updated in real time on his dashboard.

## Education & Skills

**2021** – Graduated from **Coding Academy**:

An intensive Full-Stack Development and coding bootcamp (640 hours).

Front End: JavaScript (ES6) including Object-oriented programming, MVC, HTML5, CSS3, SASS(SCSS), Bootstrap, jQuery.

Frameworks: React.JS (My specialty), Vue, Angular.

Back End: Node.js, REST API, Express, Axios.

Databases: MySQL, MongoDB.

More tools: Web Sockets with socket.io, Material-UI, Postman.
